

Wyke Solar Farm Proposals

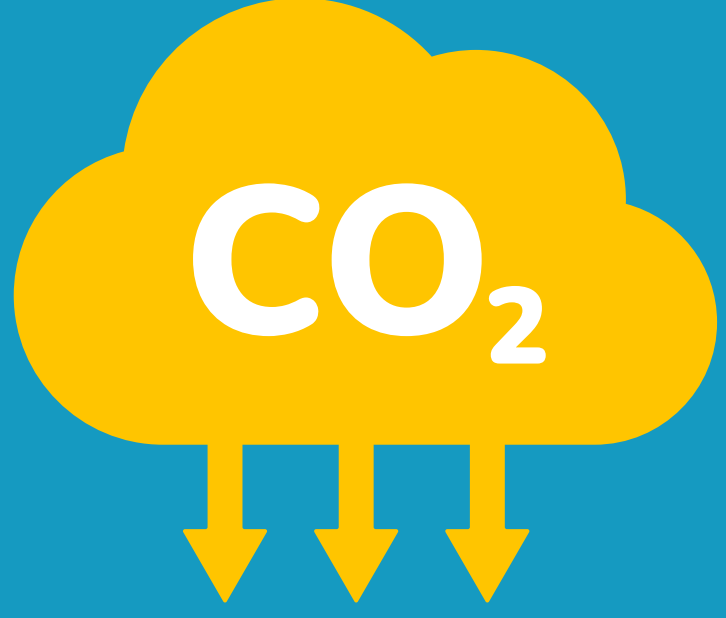

Site Location

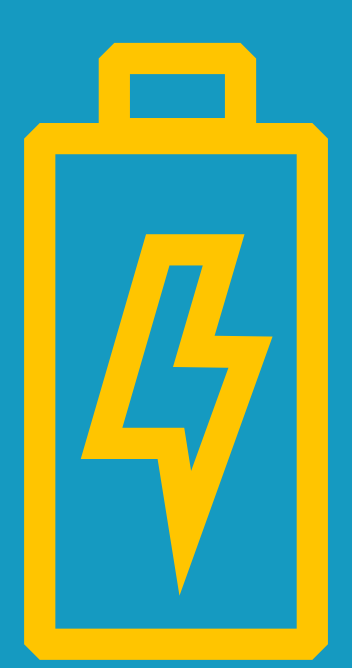

The site is located between **Sherborne** and **Yeovil**, south of the **A30** and to the east of **Bradford Abbas**. It sits within the parishes of **Bradford Abbas**, **Castleton**, **Nether Compton**, **Yeovil**, and **Over Compton**, in **Dorset** and **Somerset**.

The planned **49.9MW** solar farm will be able to meet the equivalent annual energy needs of more than **20,500 UK homes**.

CO2 savings will exceed **1.8 million tonnes** over the lifetime of the project, the equivalent of taking over **400,000 cars** off the road for a year.

We are also planning to install **batteries to store electricity**, meaning the energy can be used by UK homes when it's needed most, and not just during daylight hours.
